If you already own the analyser, a replacement of the plunger will be provided by your distributor free of charge. For analyser up to SN: 8846-2-202401 the replacement will be attached within the analyser transport box.

A plunger is included in the accessory box for maintenance and cleaning of the EC 90 instrument. If there is a blockage (e.g. salt crystals) in the fluidic path (tubes; needle; needle block etc...), the plunger shall be used to carefully loosen them. It is important to use it with care so as not to damage any of the above-mentioned components.

The plunger can be used for:

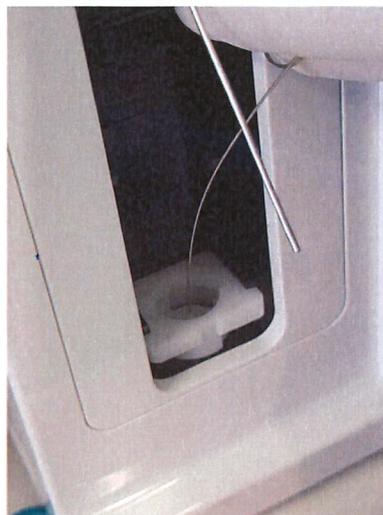

1. Cleaning of the fluidic connector

2. Cleaning of the needle, needle guide and needle block using plunger

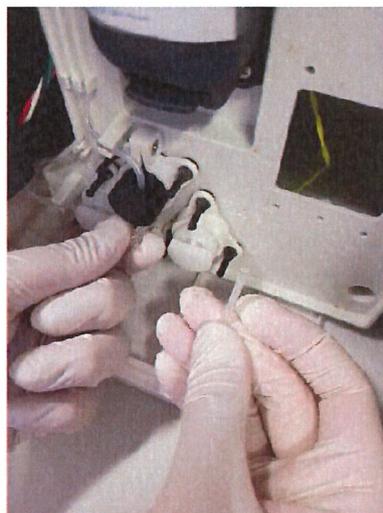

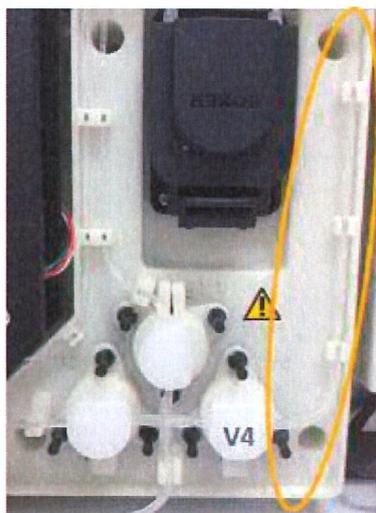

Cleaning of the needle

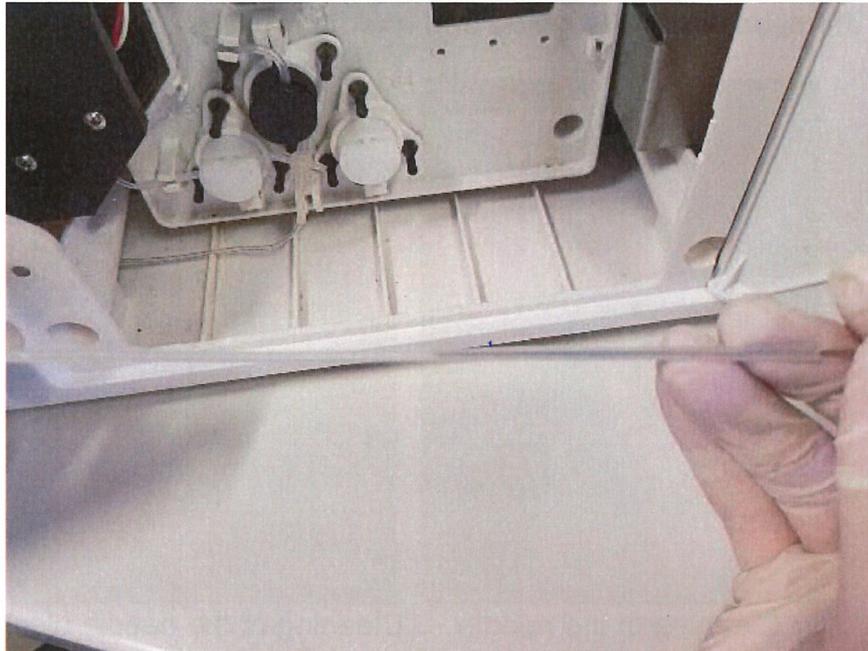

Cleaning of the needle block

3. Cleaning of the air tube
